TWO BLOCKS NORTH OF MONTANA STREET
THREE BLOCKS WEST OF LINCOLN AVENUE

NOTE!

This catalogue, without doubt, represents one of the most comprehensive lists of nursery material ever offered the trade in Southern California. Besides the varieties contained in this catalogue we grow many other varieties in small quantities. Submit us your want lists of plants that are difficult to find—in all probability we can supply them.

Ten acres devoted entirely to the growing and marketing of good plants. We are growers—not brokers.

In spite of the fact that the available variety, quantity and quality of nursery stock is much less than last year, we have not only maintained the quality of our plants but have added many valuable varieties. And in spite of the rise of most commodities, we have lowered many of our wholesale prices.

Some varieties listed here, in containers, will not be ready for sale until spring.

Most all vines in 1 gal. containers are staked with 4 ft. stakes.

Stock from our nursery, for use in Los Angeles County, does not require inspection at destination.

We guarantee plants purchased from us to be true to name and will replace any found to be otherwise, but it is mutually understood and agreed between the purchasers and ourselves that we will at no time be liable for an amount in excess of the original purchase price.

Free delivery on our regular truck routes.

Some plants listed as 5 gal. are growing in egg cans, a container which holds approximately 3½ gallons.
